

How to Add MACC mail to your Android Device

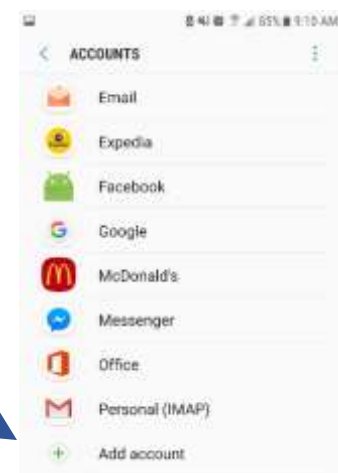

1. Select your settings gear

2. Choose Cloud and Accounts

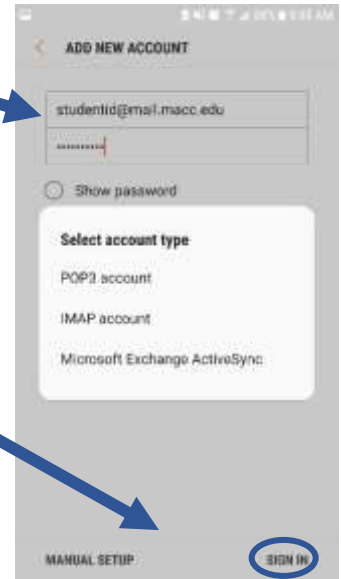

3. Add Account

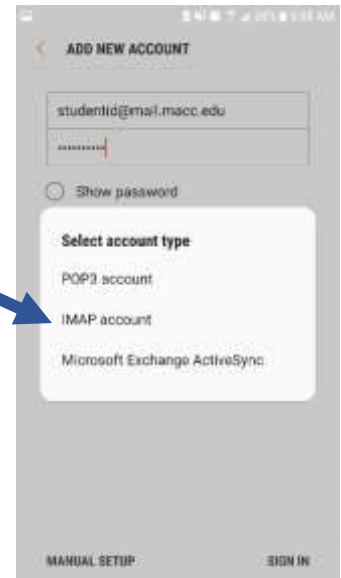

4. Select Email

5. Enter your username and password, then click on sign in

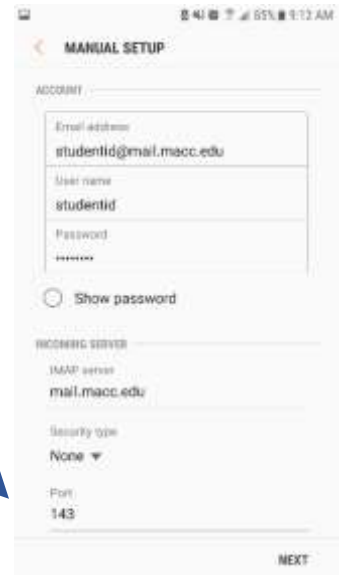

6. Choose IMAP account, it shares folders and everything between webmail and your phone. If you choose POP, it will only access messages in your mail inbox. You will not be able to send messages with this protocol.

7. Incoming Mail Settings

If your phone ask for Port number to be added use the following: **IMAP Port: 143 POP Port: 110**

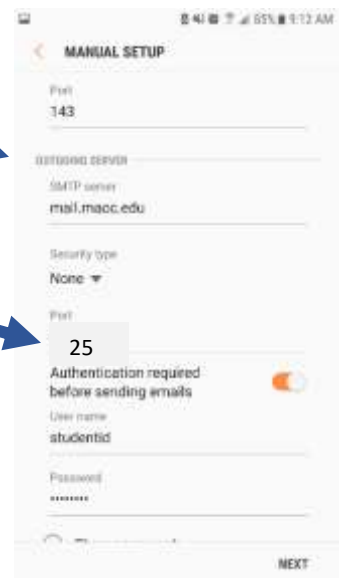

8. Outgoing Mail settings

The Host Name will be **macc.edu** for faculty/staff and **mail.macc.edu** for students.

SMTP Port: 25" to the outgoing server settings

Authentication Required: Enter Username and Password.

macc.edu (for employees)
mail.macc.edu (for students)

9. SSL needs to be in the off position. If you are asked if you want to try setting up your account without SSL. You will choose Yes.

9. SSL needs to be in the off position. If you are asked if you want to try setting up your account without SSL. You will choose Yes.
