In northeastern and central Missouri, many health professionals begin their careers at MACC. A health science career field combines science and healthcare to provide quality care to patients, no matter their age or health condition. Students in our Health Sciences Department study programs such as an Associate Degree in Nursing (ADN), Accelerated Associate Degree in Nursing (AADN), and Practical Nursing (PN). Many of the students attending this event are near graduation and ready to enter the workforce or continue with their education at a four-year college or university.

If you want to hire the right employee for your company, don't miss out on the opportunity to hire or recruit one of our graduates.

Hope to see you there!

Sincerely,
Michele McCall, Dean of Student Affairs and Enrollment Management
