

PRACTICAL NURSING CERTIFICATE

When students complete a certificate in Practical Nursing (PN) at MACC they will be able to:

- Function within the practical nursing role as a contributing member of the health care team.
- Utilize the nursing process to formulate client plans of care.
- Function within the scope of the practical nurses as described in the Missouri Nursing Practice Act.
- Prioritize nursing actions to meet the physiological, psychological, sociological, and cultural needs of the client.
- Apply nursing skills in the restorative, maintenance, and health promotion and end of life situations.
- Demonstrate responsibility and accountability for personal and professional growth and a commitment to lifelong learning.
- Apply culturally sensitive care in the local and global community.
- Demonstrate appropriate communication techniques in interacting with clients and their support persons, colleagues, and other members of the health care team.
- Provide safe, legal, and ethical care in the practice setting.
- Utilize leadership and management concepts within the practical nursing role.
- Apply appropriate principles of teaching and learning with clients and families.
- Complete the program requirements to become eligible for the NCLEX-PN exam.

This is our program promise.
